One useful result

A four-lesson mini course in planning, recording and checking a short spoken message. Work through one lesson at a time, then use the three printable worksheets on a real, low-stakes situation.

Your route through this mini book

1. Decide whether audio fits

2. Build a three-part message

3. Record for intelligibility

4. Test the action the listener understands

Read the lesson, compare the worked example and complete the action. Pages 7-9 are writing sheets; page 10 helps you review the result. The editable Markdown companion contains the same prompts for reuse in a notes app.

Beginner communication mini course with a practice assignment. No paid app, certificate, public posting or income outcome is required or promised.

Decide whether audio fits

A voice note is useful when tone or a short explanation helps and the recipient can reasonably listen. It may be less useful for precise reference numbers, long instructions or information someone must search later. Consider the person’s preference, access needs and setting. Use an agreed written route for essential details where appropriate. This course is tool-neutral and does not require a paid app or a particular phone model.

Worked example

A brief update can be spoken, while the appointment date and reference are also written in the message. The recipient does not have to replay the audio repeatedly to recover a number.

Try it now

Choose a low-stakes message and write why audio helps. Identify any detail that should also be sent in text.
